- Introduction
- Overview for Community Action
- Building the Partnership

Wednesday, August 17

- Operational Framework
- Training Asset-based Community Development

More than half of U.S. homicides occurred among people ages 15-34 in 2020.

Because all voices matter, we need you at the table.

To address violence among youth, the Nicholtown Neighborhood Association is teaming up with the City of Greenville, select non-profits, service organizations, and state/local agencies to reduce the influence of criminal groups on children.

Facilitated by the National Network for Safe Communities, this event sets the foundation for building a strong partnership.

Registration is required so visit police.greenvillesc.gov/projectsafe or scan the QR code to reserve your spot for this important initiative!
